SHALOM RUBARAMIRA

Carlton, Melbourne VIC • shalommuhoozi@gmail.com • 0404 541 339
Bachelor of Information Technology (Cybersecurity) • Monash University • Graduating 2026

PROFESSIONAL SUMMARY

Final-year Information Technology (Cybersecurity) student at Monash University with a Distinction WAM, graduating end of 2026. Combines hands-on technical project delivery — network security architecture, risk assessment, and systems documentation — with recent experience contributing to strategy and stakeholder-facing deliverables for an early-stage technology product. Comfortable operating across technical depth and clear communication, with a genuine interest in exploring consulting pathways spanning digital systems, cybersecurity, and data. Keen to bring an analytical, evidence-based approach to GHD's Summer Internship Program and contribute to real client work, bids, and tenders.

WORK EXPERIENCE

AI Marketing Strategy Intern | Tagline Jun 2026 – Present

- Contributing to growth strategy for Tagline, an AI-powered personal branding platform that helps users turn reflections, ideas, and experiences into authentic digital content.
- Conducting competitor research across AI writing tools, personal branding platforms, content workflow tools, and social media growth products to identify Tagline's market positioning — applying the same structured, evidence-based research approach used in technical risk assessments.
- Analysing digital channels including TikTok, Instagram Reels, YouTube Shorts, LinkedIn, Reddit, and Threads to identify organic growth opportunities for an AI-driven product.
- Supporting the development of story-led campaign concepts focused on user behaviour, content discovery, virality, and emotional connection.
- Translating product features such as AI-assisted content generation, reflection capture, and personal brand development into clear messaging for students, professionals, and startup teams — strengthening the ability to communicate technical concepts to non-technical audiences.
- Collaborating with a cross-functional student team to prepare strategy deliverables, campaign recommendations, creative assets, and presentation materials, mirroring the collaborative, deadline-driven nature of consulting bid and tender work.

PROJECT & SIMULATION EXPERIENCE

Secure Multi-Campus Enterprise Network | Monash University — Network Security 2026

Tools: GNS3 • MikroTik RouterOS • Ubuntu Linux • Open vSwitch • Snort IDS • BGP • IPsec/Remote Access VPN • PKI/TLS • DNS • Apache • SMTP • SSH • NAT • Bash

- Architected and deployed a simulated three-campus enterprise network in GNS3, designing segmented LANs, BGP inter-campus routing, site-to-site IPsec VPNs, and a Remote Access VPN with split-tunnelling — the kind of resilient, distributed infrastructure design relevant to large-scale client environments.
- Enforced least-privilege access through restrictive MikroTik firewall policies across nine service-level access scenarios, demonstrating a security-first, risk-aware mindset applicable to technology advisory and assurance work.
- Built a full PKI from scratch: stood up a certificate authority, signed server certificates, deployed Apache with TLS/HTTPS, configured NAT port forwarding, and validated the trusted certificate chain end-to-end.
- Deployed Snort IDS using Open vSwitch port mirroring to passively monitor traffic and detect scanning and DoS-style activity via custom detection rules, applying practical threat detection and intrusion analysis skills.
- Conducted comprehensive end-to-end validation of routing, VPN tunnels, firewall behaviour, NAT, DNS controls, and live IDS alerting, documenting all results as formal, client-ready technical evidence.

Security Awareness Analyst Simulation | Mastercard — Forage Virtual Experience Program 2025

- Conducted a structured security and risk assessment, identifying phishing vulnerabilities and evaluating control effectiveness — translating complex technical findings into clear, actionable recommendations for non-technical stakeholders.
- Analysed employee behaviour patterns to detect social engineering threats, applied systematic risk assessment methodology, and produced an evidence-based advisory report — building skills in structured analysis and written communication directly transferable to consulting deliverables.

VOLUNTEER EXPERIENCE

Volunteer — Catering & Shelter Support | Duke of Edinburgh's Award, Mauritius Feb 2022

- Provided food preparation and shelter support to homeless and low-income individuals as part of a structured community programme.
- Worked within a multicultural volunteer team, developing cross-cultural communication, adaptability, and collaborative problem-solving skills.

SKILLS & COMPETENCIES

Cybersecurity & Networks: Network security • Firewall design • IDS/Snort • IPsec VPN • PKI/TLS • BGP routing • Threat analysis • Wireshark • Linux CLI

Programming & Data: Python • SQL • Java • JavaScript • Bash • Data analysis • Database design

Strategy & Research: Competitor & market research • Digital channel analysis • Campaign concept development • Stakeholder-facing reporting

Tools & Platforms: GNS3 • MikroTik RouterOS • Open vSwitch • Git • Microsoft Office Suite • AI-powered tools

Interpersonal: Analytical problem-solving • Cross-functional collaboration • Written & verbal communication • Adaptability • Teamwork

Languages: English (Fluent)

EDUCATION

Bachelor of Information Technology (Cybersecurity) | Monash University, Melbourne Jan 2024 – Dec 2026

- Distinction WAM • Graduating end of 2026
- Key units: Cybersecurity Tools & Techniques, Network Security, Operating Systems, Databases, Systems Development, IT Professional Practice

Monash University Foundation Year | Monash College, Melbourne Aug 2022 – Dec 2023

- English (HD) • Mathematics (HD) • Accounting (HD) • Economics (D) • ICT (D)

International GCSE (IGCSE) | Galaxy International School Uganda, Kampala Nov 2020 – Jun 2022

- Mathematics (A) • Physics (A) • Environmental Management (A*) • ICT (B)

CERTIFICATIONS & ACHIEVEMENTS

- Mastercard Cybersecurity Virtual Experience Program — Forage (2025)
- Duke of Edinburgh's Award — Bronze Certification (2022)
- Red Bull Wings for Life Charity Run, Melbourne — Top 100 finishers nationally (2024)
- Best in Preservation of the School Environment Award — Galaxy International School Uganda (2021–2022)
